Climate / Quality of the soil/ Vines

Cool breeze micro-climate, one of the highest vineyards in South Africa with temperatures 6°C cooler than the valley giving our grapes slow ripening. Our vines thrive on the decomposed high mineral granite Oakleaf with sub—dominant Grenrosa and Tukulu soil formations on the mountain. The blocks are carefully manipulated for high concentrated flavour with low yields. Controlled irrigation and 7 strand hedge system with moveable foliage wires. The high trellis system ensures perfect vertical shoot positioning. Hand harvest in February at dawn to keep grapes cool for vinification. The Shiraz vines average 12 years old.

Winemaker comments:

A brazen new world style Shiraz oozing with chocolate, black cherries & spicymeat tones. Barrel matured for 12 months in American and French oak, finished off with 12 months in $4^{\rm th}$ fill giving more complexity (coconut & mocha) to the flavour spectrum.
